Superior Solutions for Protecting Today's Heavy Duty Engines

Customized products are the IEA standard.

IEA is unique in its ability to create individualized solutions ...

... at prices usually reserved for "off the shelf" products.

THE RIGHT ANSWER DOESN'T HAVE TO BE EXPENSIVE.

IEA designs to first meet the customer's cooling requirements, and then to deliver that protection in the most cost efficient way possible.

THE RIGHT ANSWER DOESN'T HAVE TO BE SLOW IN COMING.

IEA operates its manufacturing to deliver customized products in some of the industry's shortest turn around times.

THE RIGHT ANSWER COMES WITH THE RIGHT ATTITUDE.

IEA maintains the value of its products by never letting the customer go it alone: original parts, accurate, complete and readily available service information, on-site personnel.

Regardless of the application, location or budget allocation, IEA can produce an answer that will meet or exceed specification.
