

General Overview

When Schedule Counts

Enerquip has been a leading designer and fabricator of shell and tube heat exchangers for over 40 years. Our reputation for high quality and fast delivery have earned us a preferred supplier status with leading companies in the sanitary markets as well as the industrial markets that we serve.

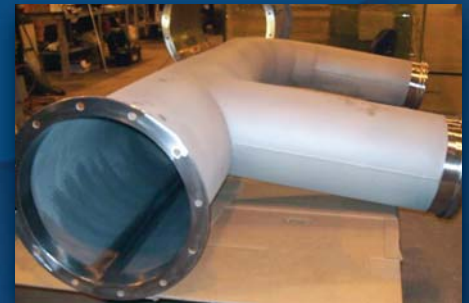

Standard Heat Exchangers

Enerquip has a full line of standard sized heat exchangers available in both sanitary and industrial models for fast delivery. We also stock replacement tube bundles, gasket sets and other parts for our exchangers to support our customers' maintenance programs.

Custom Heat Exchangers

If you need a custom exchanger for a unique heating or cooling application, Enerquip's experienced engineers can design the right exchanger for your process and space constraints. Using the experience gained from building literally thousands of different exchangers, Enerquip applies leading design software and modern manufacturing methods on every new design we create.

Custom Fabrication

In addition to high quality stainless steel heat exchangers, Enerquip also fabricates other process related stainless equipment for OEM's and system providers. These include:

- Membrane Housings
- Filter Housings
- Pressure Vessels
- Supports/Hangers
- Ductwork
- Custom components

Whether you are looking for a solution for a heating/cooling application, or you have a need for unique stainless steel equipment, Enerquip has a reputation for innovative designs, efficient manufacturing, excellent quality and outstanding customer service. Make Enerquip your preferred supplier "When Schedule Counts".

Our Specialties:

Sizes: From 2" to 48" diameters, and lengths up to 65 feet

Styles: U-tube, straight tube, and multi-pass designs available

Materials: 304ss, 316Lss, Duplex, AL6XN, Hastelloy, Copper nickel

Types: TEMA B, C, & R type exchangers that are ASME code stamped

Lead-times: Our delivery time is typically half that of many competitors

Markets we serve:

Sanitary

Food
Beverage
Dairy
Personal Care
Pharmaceutical

Industrial

Chemical
Power
Pulp/Paper
Waste Water
Renewable Energy

Enerquip = Fast Delivery "When Schedule Counts"

- Customers count on Enerquip to minimize plant down-time and get new projects up and running faster.
- Standard designs streamline the drawing approval process and allow us to use standardized parts – often produced and stocked in advance.
- Our in-house machining of tubesheets, baffles and bonnets gives us control over the complete manufacturing process – reducing delays.
- Enerquip's talented team has a strong mid-Western work ethic and a dedication to taking care of our customers.

Enerquip is also a proud supplier to the US Military.

Enerquip = High Quality

- Enerquip is an ASME certified fabricator of heat exchangers and pressure vessels.
- We have a line of 3-A approved exchangers for USDA Dairy applications.
- We build exchangers to TEMA B, C and R type requirements.
- Enerquip designs and builds to CRN for Canada and PED for Europe.
- Every exchanger is inspected, hydro-tested and code stamped prior to shipment.
