Tank Storage Systems

Storage, Heating, Mixing and Pumping

Thermal Products specializes in the design and specification of Chemical, Industrial and Process tanks and systems in a variety of capacities and processes to fit your exacting needs. Tanks are built from carbon steel, stainless steel and HDPE, XHDPE and XLPE/XLPE polyethylene and meet the ASTM-D-1998 standards and ASME Code. Our designs have excellent chemical resistance.

When you need more than storage, Thermal Products can design a tank system to heat and/or mix your batch or process. Thermal Products supplies tank systems with complimentary products to meet the demanding needs of industries such as chemical process, biomedical, pharmaceutical, food, dairy, microelectronics, photonic, breweries, boiler treatment, solid waste, water, and wastewater market segments.

Tank Types:

- Closed Top Storage tanks
- Secondary Containment Basins
- Open Top Storage Tanks
- Double Wall Storage Tanks
- Pallet Tanks
- Sloped Bottom Tanks
- Conical Bottom Tanks
- Tote Barrels
- Horizontal Tanks
- Round tanks
- Custom Tanks

Applications:

- Bulk Storage Tanks
- Brine Tanks
- Chemical Mixing Tanks
- Process Heating Tanks
- Batch Heating tanks
- Water Storage Tanks
- Holding Tanks
- Marine Tanks
- Metering Tanks
- System Storage Tanks

Whether your requirements call for a standard tank for storage or a custom tank for your process, Thermal Products Tank Solutions can design a tank system with an electric heater for tank heating and/or a tank mixer for your mixing needs.
